

ARISTA HOTEL, NAPERVILLE, IL

The Arista Hotel has 130 luxury-level rooms, an acclaimed restaurant, and a 300-person banquet room. The principals of S2O Consultants, Inc. were retained to program and design the food and laundry facilities. The 3,000-square foot kitchen is divided into contiguous, complimentary zones for storage, rough preparation, banquet cooking, restaurant cooking, room service support and warewashing. We worked closely with the DuPage County Department of Environmental Services throughout the planning process to make sure all the spaces were properly sized and had the correct finishes to promote sanitation.

The 1,000 square foot laundry operation washes, dries and presses all the towels and bed linen for the hotel rooms. It is laid out for proper flow with no cross-traffic, and is located immediately adjacent to the housekeeping department.
