

DANA CENTER, BENTLEY COLLEGE, WALTHAM, MA

The Dana Center is a 86,000-square-foot multipurpose facility and features a field house, general locker rooms, competition size swimming pool, fitness center, athletic training room and rehabilitation area, athletic team and locker rooms, and 24 athletic offices. The 30,000 square-foot renovation included a two-floor, 10,000 square-foot fitness facility; a new dining area and food court; a new façade and entrance, including a pedestrian plaza.

The principals of S2O Consultants, Inc. were hired to plan and design the foodservice facilities. The final design incorporated a food court/servery with sit down dining to encourage a “gathering spot”, a BOH kitchen that would help support on-site catering and the concession stand, with exterior access, for outdoor food service on days the exterior facilities were used. In the servery, two (2) branded concepts were used.
