

CALAMOS ASSEST MANAGEMENT CORPORATE CENTER, NAPERVILLE, IL

The principals of S2O Consultants, Inc. were retained to program and design the dining facilities for the employees of Calamos Assest Management Corporate Center. The spaces were planned to accommodate the dining needs of up to 500 people, plus catering to meeting rooms throughout the building. In addition, there were coffee pantries on the floors and a small executive dining facility.

The 3,300 square foot kitchen and servery were designed to provide both self-service and served meals in a modern, open environment. We worked closely with the DuPage County Department of Environmental Services throughout the planning process to make sure all the spaces were properly sized and had the correct finishes to promote sanitation.
